

MANVEEN SINGH

AI & Automation Engineer — Production LLM Workflows, GTM Automation, n8n/Python

+91 9289644633 manveen9650@gmail.com linkedin.com/in/Manveen github.com/Manveen07 manveen.me

Education

Maharaja Surajmal Institute of Technology

Bachelor of Technology in Computer Science

GPA - 8.6

Nov. 2022 – Aug 2026

Experience

Precise Leads

Nov. 2025 – Present

GTM / Automation Engineer

Remote

- Built an **inbound discovery engine** that monitors and scrapes multiple Slack communities in real time and auto-qualifies prospects, surfacing warm leads for the sales team to act on quickly.
- Built **automated GTM workflows in n8n** for lead routing and enrichment, pulling data from several sources to replace research the team previously did by hand.
- Built a **multi-agent AI cold-outbound system** that researches each lead across web, LinkedIn, and firmographic sources and drafts evidence-grounded personalized emails, with a **calibrated claim-level faithfulness eval** (LLM-as-judge) gating drafts — **95.5% faithfulness, 0 contradicted claims** across 300 emails.
- Shipped multiple **internal automations** across scraping, enrichment, and CRM sync, with cost, retry, and anti-hallucination controls for reliable unattended operation.

Caprae Capital Partners

June 2025 – December 2025

AI/ML Intern

Remote (Glendale, US)

- Built **data pipelines** for the Sasquatch engine that normalized high-volume financial data, with validation layers that filtered malformed and erroneous records before they reached the database.
- Led a **team of 3** to build a recruitment automation platform; built an embeddings-based candidate ranking system and a custom video-interview tool with AI-scored evaluation and n8n integration.
- Automated manual steps across the hiring workflow — intake, scoring, and scheduling — so the team could run high-volume hiring with far less hands-on coordination.

Projects

Lead Enrichment & GTM Automation Pipeline | *Python, n8n, REST APIs, PostgreSQL, CRM* [source](#) **2025**

- Multi-source lead ingestion with an API enrichment layer, automated data validation, lead scoring, CRM sync, and Slack notifications.
- Designed to run unattended with retries and data-quality checks, replacing manual research the outbound team did by hand.

PresentAI: AI-Powered Presentation Generator | *Next.js, Prisma, PostgreSQL, Gen AI* [live](#) [source](#) **March 2025**

- AI SaaS that auto-generates a structured first-draft slide deck — with speaker notes and PPT export — from a short brief, in minutes instead of hours.
- Integrated Google Generative AI for layout/theme generation; drag-and-drop editing (React DnD) with autosave on a Prisma + PostgreSQL backend; auth via Clerk.

AsanaBot: Real-Time Yoga Pose Analysis | *Python, Vision Transformers, MediaPipe, OpenCV* [source](#) **August 2024**

- Real-time pose classification and corrective feedback using Vision Transformers + MediaPipe, with efficient video processing for low-latency guidance.

Technical Skills

Languages: Python, JavaScript/TypeScript, SQL, C, HTML/CSS

AI & LLM Systems: LLM Integration, RAG, Embeddings, Vector Search, Prompt Engineering, Structured Outputs, Tool Use / Agents, Evals, Vision Transformers, NLP

Frameworks & Backend: FastAPI, Next.js, React, Node.js, REST APIs, Docker, Git, CI/CD

Automation & Data: n8n, Clay, Web Scraping, CRM & API Integration, ETL Pipelines, Lead Enrichment, Data Validation

Databases & Libraries: PostgreSQL, MongoDB, Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow
